

BoostClass2.0

PROJECT OBJECTIVES

- Defining a common framework for the identification of teaching and learning approach which can promote and implement effectively the ICT integration in adult education.
- Reinforcing the assessment and evaluation system in distance learning.
- Designing open education resources aiming to define the technical skills for the didactic use; the methodological skills for teaching approaches and for effective integration of the Apps into teaching activity.
- Utilizing the attractiveness of technology to improve social inclusion focused, mainly, on language skills improvement.
- Improving the collaborative sense among teachers and schools through the exchanging of experience, good practices to enhance the ICT use in adult school.

Boosting Classes 2.0 for high-quality teaching in adult education

THE MAIN RESULT

The main results will be as follows:

- Framework to integrate new technologies in adult education through project-based learning
- Promoting digital skills for classes 2.0 development in adult education

Target group: Adult school teachers/educators and students.
